

CRCC OFFERS OUTCOME DATA TO REHABILITATION COUNSELOR EDUCATION PROGRAMS

The Commission on Rehabilitation Counselor Certification (CRCC) is pleased to offer Master's level rehabilitation counselor education programs with outcome data in relation to the students and graduates in a particular program who have taken the CRC examination.

The Standards for CORE-Accredited programs require periodic submission of data in relation to the overall effectiveness of the program. The CRCC Outcome Data Report provides information regarding the number of individuals who passed or failed the CRC examination in comparison to the entire population of individuals who sat for the exam nationally for the same time period, provided the number of candidates from a specific program reaches ten (n=10). The performance outcome data that CRCC is able to provide in this report will demonstrate the performance of your students and graduates and the effectiveness of your program in relation to programs nationwide. In addition, the CRCC Outcome Data Report can also be utilized to provide university administration with data regarding the efficacy of the rehabilitation counselor education program.

CRCC's Outcome Data Report indicates student and graduate performance on the twelve domain areas that are tested and further broken down into both the counseling and rehabilitation/disability sections of the exam. The report can be requested to include data for a length of time not to exceed five years.

Programs interested in obtaining this outcome data must submit a written request with a \$50 fee per request. The request should indicate the number of years for which data is requested. If you require a response within ten working days from the time of receipt of a written request, the fee is \$100 per request.

If you have questions or need additional information regarding this service, please email us at info@crccertification.com or simply submit your request and fee to: CRCC, Department 4427, Carol Stream, IL 60122-4427.

CRCC is committed to promoting quality rehabilitation counseling services. We are pleased to be able to provide this service to rehabilitation counselor education programs.

Cindy A. Chapman, Executive Director, Commission on Rehabilitation Counselor Certification
